PULL OR ALTER CASING <input type="checkbox"/>	MULTIPLE COMPL <input type="checkbox"/>	CASING/CEMENT JOB <input type="checkbox"/>	
OTHER: Install and Upgrade Surface Production Facilities <input checked="" type="checkbox"/>		OTHER: <input type="checkbox"/>	

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

As a result of planned well work and DHC of Basin-Dakota (71599) and Blanco Mesaverde (72319) Pools, Four Star Oil & Gas Company anticipates an increase in production volumes necessitating installation and modification of existing surface production facilities. This may include elimination of one of two existing separators and a flow line, installation of artificial lift and meter run upgrade, and installation of an additional one or two open top tanks. Upon evaluation of resulting oil production volumes and water capacity issues, a determination will be made of which tanks will be necessary for production purposes. Currently there are two 3-phase separators, one 210 Bbl oil tank, one 95 Bbl open top water tank and a meter run on location.

Your approval of this request to install and upgrade these surface facilities will enhance the environmental and economic capabilities of this well and lease.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOC guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
