	<input type="checkbox"/> Casing Repair <input type="checkbox"/> Water Shut off
	<input type="checkbox"/> Altering Casing <input type="checkbox"/> Conversion to Injection

Other - Change casing design

**13. Describe Proposed or Completed Operations**

Due to the expectation of extreme losses in the coal interval if the 7" casing depth is to be set through the coal, it is proposed to instead set 7" casing above the coal.

The revised planned casing depth (7") will be approximately 100' (between 50' and 150') below the top of Fruitland formation. Top of Fruitland formation is 2922', therefore the revised setting depth would be approximately 3022'. The cement slurries, percentage of excess cement and the intention to circulate cement to surface remains unchanged. The slurry volumes will change slightly in accordance with the revised depth.

Verbal approval given by Steve Mason @ 3:00 pm Wednesday 9/20/06.

**14. I hereby certify that the foregoing is true and correct.**
