3. Describe Proposed or Completed Operations A casing leak was found when ConocoPhillips tried pressure testing the wellbore before commingling the MV / DK on the leak was found between 3507' and 3522', but it was small enough that we couldn't establish an injection rate. A CF and the TOC was @ 3710'. Permission was given by Troy Saylers with the BLM to perf @ 3520' and squeeze with 2000 once the squeeze is conducted, will allow the cement to cure and then will PT the casing to 500#/30 min. and then commovell per DHC 2257AZ.
