3. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Permission to install approximately 450' of new 4.5" (OD), steel, gas flowline is requested. The new line will parallel an existing 4.5" steel flowline. The existing flowline is the sales line from Romero Com 1 connecting it to Enterprise Products gathering system. The new line will facilitate installation of a compressor that will allow CDX to collect gas from Romero Com 1 and three other wells in the area (at much lower wellhead pressure) resulting in higher gas production from all four wells. Please see the attached sketch for details. All construction will be in previously disturbed soil, either on Romero Com one or across the abandoned (but not reclaimed location) of Saunders LS #1 (API# 3003906284).
