Pressures need to be indicated in numbers only, but can be decimal (i.e., 1.5, .75 etc).

If there is an initial intermediate and/or BH pressure there must be a 2 "Xs" in the Flow Status columns. (i.e., "Down to nothing" and "gas"). If these initial pressures are C the "No flow" box would be the only box with an "X" in it.

If there is water that flowed in either test, you must "X" the appropriate type of water that flowed.
