13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Plans have changed to our drilling program and therefore we need to submit a change in the drilling procedure for this well. We were only going to cavitate this well and now we are planning to underreamed the well, set the tubing, turn the well over to sales for up to 90 days before returning and cavitating the coal interval. We will run the liner after the cavitation has taken place.

We would also like to request an extension on closing the reserve pit since it will be needed for up to 180 days after the drilling rig moves off.
