## 13. Describe Proposed or Completed Operations

Burlington Resources is requesting permission to deepen the subject well for a sump. Current TD is 3265' and we anticipate wanting to drill to about 3340'. We will utilize a mudlogger to monitor gas liberated while drilling into the Pictured Cliffs (PC) formation, but do not anticipate any producible PC gas as we are miles away from any PC pool and the nearest PC tests have failed to produce. In the unlikely event that we drill significant additional Fruitland Coal we will be looking to drill 90' below the new coal. Regardless we will not drill beyond the base of the PC.

*PC non - prod; Sump request granted 12/20/06 CEF*
