	<input type="checkbox"/> Change Plans	<input type="checkbox"/> Plug and Abandon	<input type="checkbox"/> Temporarily Abandon	
	<input type="checkbox"/> Convert to Injection	<input type="checkbox"/> Plug Back	<input type="checkbox"/> Water Disposal	

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Due to falling production, caused by the inability to pump water and partially plugged liner, we propose to pull the liner, and drill 100' into the Pictured Cliff. This will give us a sump below the coal to pump water from. We will use a Mudlogger during drilling to monitor the Pictured Cliff for signs of gas. The Pictured Cliff formation in this area is non-productive. 5 1/2" liner will be run into the sump and well put on production. An earthen reserve pit with blow pit will be required. The reserve pit will be built and closed according to Koch Exploration CO, LLC (KEC) General Pit Guidelines on file with NMOCD, Aztec Office. Pit will be closed according to KEC General Pit Guidelines, and seeded with BLM approved seed mix, as soon as possible after work is completed. Work is scheduled to start as soon as rig is available.  
Proposed Total Depth: 3056'

PC non prod; Sump request granted 1/16/07

## The current pipe configuration is:

9 5/8" 36# J-55, set @ 227'

7" 20# J-55, set @ 2717'

5 1/2" 15.5# J-55 Perforated Liner - None in well at this time, we plan to run when deepened

2 3/8" 4.7# J-55 Production Tubing @ 2926'

14. I hereby certify that the foregoing is true and correct	
Name (Printed/Typed) John Clark	Title District Superintendent
