*Patina San Juan, Inc. seeks an exception to rule 19.15.3.112.C.1.b. The Rio Bravo 27 #05 has been drilled and completed in the Basin Dakota and Basin Fruitland Coal zones. A packer was set at 2020'.*

*We are requesting a variance to the 100' rule for the packer depth. The well has been set up for a plunger lift system to aid in the optimization of production. By placing the packer as high as possible, the added volume in the annulus will help create the energy needed to lift the plunger during cycles. We believe that this type of operation will eliminate the necessity of having to vent the wells to get the plunger to surface.*

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOC guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
