13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

Above mentioned well was spud 1/8/1985 and drilled as a Basin Dakota. 12/16/1992 the well was recompleted to the Blanco Pictured Cliffs.

On 10/23/06 during analysis of CO2 volumes produced in our wells, it came to BP's attention that the above mentioned well completed in the PC is almost certainly producing Fruitland Coal gas. This interpretation is based on the high CO2 volume in the well, the apparent lack of pay in the interval completed and the fact that it is seeing similar pressures to the Fruitland producers in the area.

Because BP has 2 other FC producers (Pritchard B 5 30-045-27397 & Pritchard B 5S 30-045-32122) in the drill block the well was shut in on 10/24/06 @ 9:00 am.

Per conversations with Jim Lovato (BLM) & Charlie Perrin (OCD) BP is evaluating options and will file Notice of Intent by end of 2nd quarter 2007.
