A total of four (4) deviation surveys were run using a SURE SHOT tool. These surveys were as follows:

Surface Hole: 132' = 1 deg.

Production Hole: 550' = 1 deg., 960' = 1 ¼ deg. and 1521' = ¾ deg.

These surveys were given to Coleman Oil & Gas Inc. for placement in the well file.

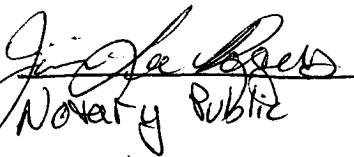

This is correct and accurate to the best of my knowledge.
