Re: Albright #7E
SESE, Section 22, T-29-N, R-10-W
30-045-25057

Gentlemen:

JS
The above referenced well is a Chacra/Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on August 29, 2001. DHC-2313 was issued for this well.

Gas:	Chacra	49%
	Mesaverde	30%
	Dakota	21%

Oil:	Chacra	0%
	Mesaverde	59%
	Dakota	41%

The Mesaverde and Dakota percentages are based upon reserves assigned to each formation founded on production from the respective formations before workover operations and after workover operations on the Chacra formation. The Chacra formation does not produce any oil; therefore, oil percentages remain the same as before the addition of the Chacra formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole
Regulatory Supervisor
