4/4/07

Plans are to attempt to run only the surface and intermediate casing on the subject well. We will use 8-3/4" bit on the second string and attempt to reach TD. And then run the 4-1/2" as production casing and cement it with Foam cement to surface. If conditions warrant we will have to run the 7" casing (intermediate casing) and then follow with the 6-1/4" hole to TD and run the 4-1/2" casing.

Verbal approval was given by Steve Hayden on 4/4/07.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
