DAKOTA	666 MCFD	44%		44%
	1498			

JUSTIFICATION OF ALLOCATION: This well was completed in the Dakota and produced as a standalone well. The Mesaverde was completed and produced as a standalone until sufficient data was captured. The allocation is based on EUR for each zone with unique production history. Oil was not present during flow test operations. For that reason, oil percentages are based upon the gas allocation and are provided in the event this wellbore begins producing oil at some point in the future.
