This well has been completed in the Mesaverde formation and therefore the well name has changed. The new name is S.J. 29-5 Unit #35R.

See the attached for the procedure used to recomplete this well into the Mesaverde zone.

Note: Phillips attempted to perf the MV zone (see sundry dated 9/28/95) and was unable to establish injection into these perfs. On 12/14/95 we talked to Ernie Busch and received verbal approval from him to further perforate and frac the MV zone.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
