13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

As per verbal conversation between Brent Martin (XTO Drilling Mgr) and Adrienne Brunley (BLM rep) the following changes were discussed to change the intended completion effort from the originally proposed Blanco MV completion to a FC/PC test:

Current Wellbore Condition: 8-5/8" surf pipe set and cmtd from 379' back to surf. Original borehole drilled to 6452' MD before loss circ encountered. Stuck pipe during setting of cmt plug and back-off made @ 5892'. After fishing efforts failed, set a cement plug and sidetracked hole @ 5580' and drilled to 6586' MD fighting loss of circ. Set a cmt plug and sidetracked hole @ approx 5580' and drilled to 6586' MD (fighting loss of circ). Set a second cement plug and stuck DP again. Made back-off @ 6052' MD. Cliffhouse Sandstone estimated @ 5964' MD/5921' TVD.

Proposed Action to be Taken: Isolate the top part of the Cliffhouse SS with a min 100' length cmt plug with a min 200% open hole excess factor and top of plug a min of 50' above the Cliffhouse SS. Location of the plug is to be confirmd w/tag with the drillstring. 5-1/2" prod csg is to be run and cmtd after the cmt plug is placed and tg'd. Approval for completion attempts in the FC/PC is contingent on Dir Surveys submitted to show exact location of proposed zones and submittal of appropriate paperwork.
