13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy, Inc. is requesting an exception to NMOC Rule 303A to permit downhole commingling of production from the Basin Dakota pool (71599), the Blanco Mesaverde pool (72319). XTO proposes to downhole commingle these pools upon completion of the well. The proposed allocations were determined by individual zone well test as per attached justification attachment:

Pool	Gas	Oil	Water
Basin DK	69%	90%	74%
Blanco MV	31%	10%	26%

RCVD JUL6'07
OIL CONS. DIV.
DIST. 3

Ownership in this well is diverse and notification was made to owners by certified mail, return receipt on 3-15-07. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves, and violation of correlative rights. An application for downhole commingling was submitted to the New Mexico Oil Conservation Division on 6/25/2007
