OIL CONS. DIV.
DIST. 3

13. Describe Proposed or Completed Operations

The subject well was originally permitted as a Mesaverde/Dakota commingle. It was completed 8-21-06 as a single Mesaverde because it was thought there was a down hole fire in the well at approximately 6756'. After re-evaluating the well, it is now thought that there is a fish in the hole @ 6756' and no down hole fire occurred. The Dakota had been perforated and fracture treated at the time of the original completion. CDX Rio is going to attempt to fish out the equipment that was left in the hole and commingle the Dakota formation with the producing Mesaverde formation under DHC-2130az.

— Provide 1st delivery for the Dakota and commingling effective date upon production start-up

14. I hereby certify that the foregoing is true and correct.
