13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed when testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator determined that the final site is ready for final inspection.)

Phillips plans to log this well for uphole potential. Other Operators in the area have successfully completed wells in the Ojo and that is what we are going to look for. We have already determined that we won't be recompleting to a deeper zone. If the logs prove good then we will submit a recompletion.

In the likely event that the logs prove no potential in that zone, we will then P&A this well. Phillip will be contracting out this work to Key Energy. Tentative plans are to begin work in the Spring 2002. A detailed procedure will be submitted and approved before any P&A work begins.
