(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Thompson Engineering & Production Corp. intends to temporarily abandon (TA) the above mentioned well by setting a CIBP at ~ 4200' (top perforation is at 4240'), in order to review the possibility of re-entering the Fruitland Coal formation by horizontal drilling from existing well bore. The casing will be pressure tested to 500 psi to make sure the casing integrity is OK before releasing the rig.

Please note that the well has been previously approved for P&A. Cancel P&A TA approved until 9/1/08

14 I hereby certify that the foregoing is true and correct

Signed [Signature] (John C. Thompson) Title Agent/Engineer Date 08/30/07
