13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomplate in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

XTO Energy proposes to P&A the initial surface casing of the Ute Indians A #49 as per the conversation between Dan Rabinowitz and Drilling Engineer John Egelston. Please see attached well-bore diagrams.

The cement used will be of sufficient volume to fill the surface casing back to surface as well as the cellar. Approximately 80 cu.ft. of cement will be used.

Subject Re: Sundry for Ute Indians A #49 

Good Morning Justin,

Sorry I didn't get back to you sooner. Another crisis.

Verbal approval is given this date to Plug and Abandon the Surface Casing on the A #49 well as per our discussions and as shown in the wellbore diagram provided to the BLM on 9/16/07. Notify this office as soon as you know when the abandonment will take place. In lieu of a BLM representative being on location, a photograph of the cement filled cellar will be required for permanent proof the P&A took place as authorized.

Please send signed copies of the Sundry Notice for legal authorization of the abandonment.

Thanks!!

~ Dan
