13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. requests approval to downhole commingle production from the Basin Dakota (71599) and the Wildcat Basin Mancos (97232) upon completion of the well. The proposed gas and oil allocations are based on estimated average ultimate recovery per well of the 8 Dakota and 9 Gallup wells in T27N-R11W. Water allocation is based on EUR water production per well. Please see attached Dakota & Gallup EUR analysis:

Dakota	Gas: 75%	Oil: 38%	Water: 58%
Mancos	Gas: 25%	Oil: 62%	Water: 42%

Ownership is diverse between pools and notice to owners was sent 9/17/07 via certified, return receipt US mail. The downhole commingle will offer an economical method of production and protect against reservoir damage, waste of reserves and protect correlative rights. The NMCD has been notified by filing of C107A on 9/17/2007
