13. Describe Proposed or Completed Operations

It is intended to deepen this existing Basin Fruitland Coal well to approximately 3389' into the Pictured Cliffs formation. It is anticipated that the Pictured Cliffs is not productive in this wellbore. The existing tubing and liner will be pulled, the hole will be circulated clean. The well will be drilled to new total depth. The wellbore will be cleaned out. The 5 1/2" 15.5# K-55 liner will be rerun at approximately 3034-3389'. Tubing will be rerun and the well returned to production. (Per E. Pippin a mudlogger will be on location to monitor for PC gas shows - CEK 9/29/03).

CONDITIONS OF APPROVAL

Adhere to previously issued stipulations.

Legal Location 2445 FNL / 1970 FEI

Sec 04, **T.** 30N, **R.** 5W

Lease Number NM - 4456

Field Inspection Date: N/A

The following stipulations will apply to this well unless a particular Surface Managing Agency or private Surface owner has supplied to the BLM and the operator a contradictory environmental stipulation. The failure of the operator to comply with requirements may result in the assessments of penalties pursuant to **43 CFR 3163.1 or 3163.2**. A copy of these conditions of approval shall be present on the location during construction, drilling and reclamation activity.

An agreement between operator and fee land owner will take precedence over BLM surface stipulations, unless **(In reference to 43 CFR Part 3160): 1) BLM determines that operators actions will affect adjacent Federal or Indian surface, or 2) operator does not maintain well area and lease premises in a workmanlike manner with due regard for safety, conservation and appearance, or 3) no such agreement exists, or 4) in the event of well abandonment, minimal Federal restoration requirements will be required.**

STANDARD STIPULATIONS FOR ALL WORKOVERS: All surface areas disturbed during workover activities and not in use for production activities, will be reseeded the first July – September period after the well has been put back into production. This should occur in the first 12 months after completion of workover activities.

SPECIAL STIPULATIONS FOR THIS SITE:

1. Pits will be fenced during workover operation.
2. All disturbance will be kept on existing pad.
3. Empty and reclaim pit after work completed.
4. Pits will be lined with an impervious material at least 12 mils thick Prior to closing the pit, the liner will be cut off at mud level. The excess liner will be hauled to a licensed disposal area.
5. A Mud Logger must be on location to monitor for the PC gas shows.
