13. Describe Proposed or Completed Operations

ConocoPhillips wishes to be granted permission to build and utilize the subject well pad and access road on Federal lands. This is a directional drill well that we are applying for an APD with the State NMOCDD since the bottomhole location is on FEE. We feel that the San Juan 28-7 Unit agreements approved by the BLM covers our rights to utilize the well pad and access road to drill and complete this well.

Attached you will find the plat, topo, well pad diagram, case recordation showing that the Lease on which the surface location lies is included in the 28-7 Unit. Included also are the Biological Survey Report and the copy of the arch report we have on file for this access road and well pad. This well is also located within the SJ 28-7 Unit Participating Area (PA) for MV and for DK which indicates that all wells in the PA have the same interest ownership for wells on State or Federal lands.
