13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. is doing record cleanup from this acquired well in applying for a downhole commingle. We anticipate commingling production from the Basin Fruitland Coal (71629) and the Twin Mounds Fruitland Sand Picture Cliffs (86620). Both pools are in the NMOC pre-approved pool combinations for DHC in the San Juan Basin. Allocations are based on production from the WF Federal 20 #1, #2 & #3:

Basin Fruitland Coal	Gas 49%	Water 49%	Oil 49%
Twin Mounds Fruitland Sand PC	Gas 51%	Water 51%	Oil 51%

Common ownership between pools makes notifying owners of our intent unnecessary. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights. The NMOC as notified of our intent via submittal of Form C103 on 11/1/2007.

14 I hereby certify that the foregoing is true and correct
