- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

During cleanout of wellbore this year, production liner hung-up when trying to set it. When running the new 5 1/2" pre-drilled liner, liner was dropped 560' from surface. We were able to fish 7 of the 11 joints of 5 1/2" liner from hole. 4 joints totaling 168' were not retrieved, top of fish is @ 3232'. We did attempt to drill beside the 4 joints left in wellbore, and set new 4 1/2" 12.60# and 5 1/2" 15.50# tapered liner, top of line @ 2764', cross over @3062', bottom of liner landed @ 3202'.

We returned the well to production but, volumes are greatly decreased, and we are unable to lift fluids. We intend to temporarily abandon this well until we can devise an alternate production process (i.e. sidetrack, P&A-redrill, etc). Plans by 6/1/08
