- 13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Notified Mr. Stephen Mason with Farmington BLM that we were rigged up and starting work-over January 28, 2008. Moved in and rigged up Silver Star Rig #5. POOH with rods and tubing. RIH with retrievable bridge plug and set at 1325 FT KB. Pressure tested casing to 500 psig with Farmington BLM witness January 30, 2008, Mr. Joe Ruybalid. RIH with bit, drill collars and tubing and drilled out bridge plug at 1610 FT KB. RIH with tubing and rods put well back on production February 12, 2008. Found several mechanical problems with production string during work-over. Coleman Oil & Gas, Inc. would like to request one to three month production test for Fruitland Coal formation instead of temporary abandonment as previously indicated.
