Type of Submission	Type of Action
<input checked="" type="checkbox"/> Notice of Intent	<input type="checkbox"/> Abandonment <input checked="" type="checkbox"/> Change of Plans <input checked="" type="checkbox"/> Other - sidetrack
<input type="checkbox"/> Subsequent Report	<input type="checkbox"/> Recompletion <input type="checkbox"/> New Construction
<input type="checkbox"/> Final Abandonment	<input type="checkbox"/> Plugging <input type="checkbox"/> Non-Routine Fracturing
	<input type="checkbox"/> Casing Repair <input type="checkbox"/> Water Shut off
	<input type="checkbox"/> Altering Casing <input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

Was drilling the 7-7/8" hole and reached 7420' - TD 1/28/08. POH w/DD tools. While washing & reaming the hole in preparation for the casing we encountered many tight spots while working our wiper sweeps. Worked hole from 2/1 - 2/14 and was only able to reach back down to 6790'. 2/14 - 2/20 had to shut rig down because couldn't get fuel to location due to road conditions due to weather. 2/20/08 started again to W&R hole until 2/28/08 finally reached TD again. POOH w/tools and made another wiper run and only able to get to 1040' after 6 days of trying. Called for verbal approval from the BLM (Jim Lovato, Wayne Townsend & Chip Harraden) to sidetrack the well. Will attempt to drill back down with 8-3/4" hole & reach @ 1000' and set a 400+ cmt plug to cover the Nacimiento water interval and then will drill window to sidetrack around 700', head in a slightly north/easterly direction from the previously plans. Will run intermediate casing (7", 20#, J-55) and set inside the Menefee interval and cement to surface. Then air drill the production casing to the original TD of 7420'. Will then run 4-1/2", 10.5#/11.6# J-55 or L-80 casing and cement trying back into the intermediate 7" casing.

Verbal approval was given by the BLM @ 10:00 am 3/6/08.

14. I hereby certify that the foregoing is true and correct.
