13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

XTO Energy Inc. requests approval for exception to Rule 303-C to permit downhole commingling of production from the Blanco Mesaverde (72319) and the Otero Chacra (82329) in this well. Due to a failed packer leakage test, XTO would like to DHC for economic reasons. Allocations are based upon previous production from each of the two formations and are as follows:

|                  |          |           |             |
|------------------|----------|-----------|-------------|
| Otero Chacra     | Gas: 24% | Oil: 0%   | Water: 0%   |
| Blanco Mesaverde | Gas: 76% | Oil: 100% | Water: 100% |

Pools are included in the NMCD pre-approved pool combinations for downhole commingling in the San Juan Basin. Ownership is common in both zones; therefore, notification was not necessary. Downhole commingling will offer an economical method of production while protecting against reservoir damage, waste of reserves & violation of correlative rights.
