Devon Energy Production Company, L.P. would like to submit pressure test information on the above named well NEBU 211 POW. An MIT was conducted pressuring up from 560-575 psi and has successfully completed this test. A pressure bomb was also run into the well, currently we would like to request an extension for the results of the bomb.

The testing of the well was delayed by the Operations and Reservoir departments for research to ensure the most accurate data possible was obtained for these tests.
