13 Describe Proposed or Completed Operations (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once Testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

6/5/08 Moved on location and rigged up J.C. Well Service. Pulled 2 jts of 2-3/8" tubing and 86 jts of 1-1/4" tubing. Found a soap plug at the bottom of the 2-3/8" tubing and several holes in the 1-1/4" tubing. Ran 87 jts of 1-1/4" tubing and landed it at 2837' KB. Released the rig.

6/25/08 Moved on a Hurricane air package. Unloaded the well at 550# and blew the well for 30 min at 450#. Recovered a total of 15 bbls of water. SI the well for buildup. SICP = 73 psi and SITP = 0#.

Since the well only built up to line pressure, it will require some means of artificial lift to return this well to production. TEPC requests an extension of 90 days to evaluate it options and return the well to production or file a plugging procedure.
