District I 1625 N. French Dr., Hobbs, NM 88240 1301 W. Grand Ave, Artesia, NM 88210 District III 1000 Rio Brazos Rd., Aztec, NM 87410

State of New Mexico **Energy Minerals and Natural Resources**

Department Oil Conservation Division 1220 South St. Francis Dr. Santa Fe, NM 87505

Form C-144 June 16, 2008

For temporary pits, closed-loop sytems, and below-grade tanks, submit to the appropriate NMOCD District Office.

For permanent pits and exceptions submit to the Santa Fe Environmental Bureau office and provide a copy to the

District IV appropriate NMOCD District Office. 1220 S St. Francis Dr., Santa Fe, NM 87505 Pit, Closed-Loop System, Below-Grade Tank, or ROWD JUL 22 '08 Proposed Alternative Method Permit or Closure Plan Application OIL CONS. DIV. $\overline{\mathbf{X}}$ Permit of a pit, closed-loop system, below-grade tank, or proposed alternative method $\overline{\mathbf{N}}$ Type of action: Closure of a pit, closed-loop system, below-grade tank, or proposed alternative method Instructions: Please submit one application (Form C-144) per individual pit, closed-loop system, below-grade tank or alternative request Please be advised that approval of this request does not relieve the operator of liability should operations result in pollution of surface water, ground water or the environment. Not does approval relieve the operator of its responsibility to comply with any other applicable governmental authority's rules, regulations of ordinances OGRID#: 217817 Operator: ConocoPhillips Company Address: PO Box 4289, Farmington, NM 87499 Facility or well name: Maddox WN Federal #1 API Number: 30-045-09529 OCD Permit Number: U/L or Qtr/Qtr: H(SENE) Section: 13 Township: 30N Range: 13W County: San Juan Longitude: **108.15035100' W** NAD: **X** 1927 1983 Center of Proposed Design: Latitude: 36.8155510' N Surface Owner: **X** Federal State Private Tribal Trust or Indian Allotment X Closed-loop Systems: Subsection H of 19.15.17.11 NMAC Pit: Subsection F or G of 19.15.17.11 NMAC Drying Pad X Tanks Haul-off Bins Other: Drilling Workover Temporary: Lined Unlined Permanent Emergency Cavitation Unlined Liner type: Thickness mil LLDPE HDPE PVC Lined Liner type: Thickness ___ mil LLDPE HDPE PVC Other: String-Reinforced Seams: Welded Factory Other: Seams: Welded Factory Other 500 Volume: yd3 _ bbl Dimensions: L ____xW ___xD Dimernsions: Length 45' x Width Below-grade tank: Subsection I of 19 15.17 11 NMAC Fencing: Subsection D of 19 15.17.11 NMAC Volume: Chain link, six feet in height, two strangs of barbed wire at top Type of fluid: Four foot height, four strands of barbed wire evenly spaced between Tank Construction Material: one and four feet Secondary containment with leak detection **Netting:** Subsection E of 19.15.17.11 Visible sidewalls, liner, 6-inch lift and automatic overflow shut-off Screen Netting Other Monthly inspections Visible sidewalls and liner Visible sidewalls only Subsection C of 19.15 17.11 NMAC Signs: Other: 12"x 24", 2" lettering, provided Operator's name, site location, and Liner type: Thickness: mil HDPE PVC emergency telephone numbers X Signed in compliance with 19.15.3.103 NMAC Other: Alternative Method: **Administrative Approvals and Exceptions:** Justifications and/or demonstrations of equivalency are required. Please Submittal of an exception request is required. Exceptions must be submitted to the Santa Fe Environmental Bureau office for consideration refer to 19.15.17 NMAC for guidance. of approval. Please check a box if one or more of the following is requested, if not leave blank: Administrative approval(s): Requests must be submitted to the appropriate division district or the Santa Fe Environmental Bureau office for consideration of approval. (Fencing in Design Plan) Exception(s): Requests must be submitted to the Santa Fe

Environmental Bureau office for consideration of approval.

Siting Criteria (regarding permitting): 19.15.17.10 NMAC Instructions: The applicant must demonstrate compliance for each siting criteria below in the application. Recommendations of acceptable source material are provided below. Requests regarding changes to certain siting criteria may require administrative approval from the appropriate district office or may be considered an exception which must be submitted to the Santa Fe Environmental Bureau Office for consideration of approval. Applicant must attach justification for request. Please refer to 19.15.17.10 NMAC for guidance. Siting criteria does not apply to drying pads or above grade-tanks associated with a closed-loop system.				
Ground water is less than 50 feet below the bottom of the temporary pit, permanent pit, or below-grade tank. - NM Office of the State Engineer - iWATERS database search; USGS; Data obtained from nearby wells	Yes	□No		
Within 300 feet of a continuously flowing watercourse, or 200 feet of any other watercourse, lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark). - Topographic map; Visual inspection (certification) of the proposed site	Yes	□No		
Within 300 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application.	Yes	□No		
(Applies to temporary, emergency, or cavitation pits and below-grade tanks) - Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	□NA			
Within 1000 feet from a permanent residence, school, hospital, institution, or church in existence at the time of initial application. (Applied to permanent pits)	☐Yes ☐NA	No		
- Visual inspection (certification) of the proposed site; Aerial photo; Satellite image	ШМА			
Within 500 horizonal feet of a private, domestic fresh water well or spring that less than five households use for domestic or stock watering purposes, or within 1000 horizontal feet of any other fresh water well or spring, in existence at the time of initial application.	Yes	□No		
- NM Office of the State Engineer - iWATERS database search; Visual inspection (certification) of the proposed site.				
Within incorporated municipal boundaries or within a defined municipal fresh water well field covered under a municipal ordinance adopted pursuant to NMSA 1978, Section 3-27-3, as amended	Yes	□No		
- Written confirmation or verification from the municipality; Written approval obtained from the municipality Within 500 feet of a wetland.	Yes	□No		
- US Fish and Wildlife Wetland Identification map; Topographic map; Visual inspection (certification) of the proposed site Within the area overlying a subsurface mine.	□Yes	По		
- Written confirmation or verification or map from the NM EMNRD - Mining and Mineral Division				
Within an unstable area. - Engineering measures incorporated into the design; NM Bureau of Geology & Mineral Resources; USGS; NM Geological Society; Topographic map	∐Yes	∐No		
Within a 100-year floodplain - FEMA map	Yes	□No		
Temporary Pits, Emergency Pits, and Below-grade Tanks Permit Application Attachment Checklist: Subsection B of 19.15.17.9 NMAC				
Instructions: Each of the following items must be attached to the application. Please indicate, by a check mark in the box, that the documents are attached.				
Hydrogeologic Report (Below-grade Tanks) - based upon the requirements of Paragraph (4) of Subsection B of 19.15.17.9 NMAC Hydrogeologic Data (Temporary and Emergency Pits) - based upon the requirements of Paragraph (2) of Subsection B of 19.15.17.9 NMAC Siting Criteria Compliance Demonstrations - based upon the appropriate requirements of 19.15.17.10 NMAC Design Plan - based upon the appropriate requirements of 19.15.17.11 NMAC Operating and Maintence Plan - based upon the appropriate requirements of 19.15.17.12 NMAC Closure Plan - based upon the appropriate requirements of Subsection C of 19.15.17.9 NMAC and 19.15.17.13 NMAC				
Previously Approved Design (attach copy of API Number: or Permit				
Closed-loop Systems Permit Application Attachment Checklist: Subsection B of 19.15.17.9 NMAC Instructions: Each of the following items must be attached to the application. Please indicate, by a check mark in the box, that the documents are attached.				
Geologic and Hydrogeologic Data (required for on-site closure) - based upon the requirements of Paragraph (3) of Subsection B of 19.15.17.9 Siting Criteria Compliance Demonstrations (required for on-site closure) - based upon the appropriate requirements of 19.15.17.10 NMAC Design Plan - based upon the appropriate requirements of 19.15.17.11 NMAC Operating and Maintenance Plan - based upon the appropriate requirements of 19.15.17.12 NMAC				
X Closure Plan - based upon the appropriate requirements of Subsection C of 19.15.17.9 NMAC and 19.15.17.13 NMAC				
Previously Approved Design (attach copy of API Number:

Section. B

This is to certify that the information in Section A above is true and complete to the best of my knowledge. and belief.

Ihree States Natural Gas Co (Operator)

(Representative)

Box: 67# Farmington, New Mexico

Address

This is to cent well location sh plat in Section B was from field notes of ecsurveys made on the or my supervision and that same is true and **educed** the best of my knowledge end belief.

Date Surveyed July 29:1960

Ernest V. Echohawk

Registered Land Surveyor

Certificate No. 1545

ConocoPhillips Company Closed-loop Plans

Closed-loop Design Plan

COPC's closed loop system will not entail a drying pad, temporary pit, below grade tank or sump. It will include an above ground tank suitable for holding the cuttings and fluids for rig operations. The tank will be sufficient volume to maintain a safe free board between disposal of the liquids and solids from rig operations.

- 1. Fencing is not required for an above ground closed-loop system
- 2. It will be signed in compliance with 19.15.3.103 NMAC
- 3. A frac tank will be on location to store fresh water

Closed-loop Operating and Maintenance Plan

COPC's closed-loop tank will be operated and maintained to contain liquids and solids in order to prevent contamination of fresh water sources, in order to protect public health and the environment. To ensure the operation is maintained the following steps will be followed:

- 1. The liquids will be vacuumed out and disposed of at the Basin Disposal facility (Permit # NM-01-005). Solids in the closed-loop tank will be vacuumed out and disposed of at Envirotech (Permit # NM-01-0011) on a periodic basis to prevent over topping.
- 2. No hazardous waste, miscellaneous solid waste or debris will be discharged into or stored in the tank. Only fluids or cutting used or generated by rig operations will be placed or stored in the tank.
- 3. The division district office will be notified within 48 hours of the discovery of compromised integrity of the closed-loop tank. Upon the discovery of the compromised tank, repairs will be enacted immediately
- 4. All of the above operations will be inspected and a log will be signed and dated. During rig operations the inspection will be daily.

Closed-loop Closure Plan

The closed-loop tank will be closed in accordance with 19.15.17.13. This will be done by transporting cuttings and all remaining sludges to Envirotech (Permit # NM-01-0011) immediately following rig operations. All remaining liquids will be transported and disposed of in the Basin Disposal facility (Permit # NM-01-005). The tanks will be removed from the location as part of the rig move. At time of well abandonment, the site will be reclaimed and re-vegetated to pre-existing conditions when possible.
