13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

The above mentioned well has an exception to Rule 107 Tbg depth. This exception was approved by the NMOCD 7/17/08 and will expire 10/11/08. The well did not begin producing until 8/25/08. Therefore BP has not had time to evaluate the sand production coming from the Chacra reservoir. It is our intent to run a slick line to determine Chacra sand production.

BP respectfully requests an additional 90 day extension to the tubing exception until slick line data can be evaluated.
