13. Describe Proposed or Completed Operations

While drilling the subject well we encountered water at the Chacra interval and the hole became wet. We were able to drill to 5779', but ended up losing 1 jt. drill pipe, 6 drill collars, a cross-over and the air hammer down hole. The Top of Fish is @ 5569'. We fished for several days but were unable to recover fish. Plans now are to set a cement retainer approx. 30' above the 7" shoe @ 4454' and then pump cement to fill the open hole section covering the fish with cement. We will then cut a window in the 7" casing just above the retainer and sidetrack the well in a slightly easterly direction to avoid the fish and continue downhole to TD. The BLM (Jim Lovato) and OCD (Kelly Roberts) gave their approval on 9/6/08. See the attached sidetrack procedure.

- Well will now be completed in the Mesaverde only.

14. I hereby certify that the foregoing is true and correct.
