Re: San Juan 32-9 Unit 39, B, 26, 32N, 10W, API # 30-045-11286

Dear Ms. Zubrod:

The 2008 Bradenhead test on the above well indicates a failure. In order to comply with Rule 108, prevent waste and protect fresh water, you are hereby directed to initiate remedial activity before January 9, 2009. Initial intermediate psi of 228 was reported with a 5 minute shut in pressure of 228 psi. Bradenhead pressure was 0 psi. The production casing pressure dropped as the intermediate casing was being blown down.

With your sundry please attach a copy of the last two tests, a current wellbore schematic including formation and cement tops. Indicate the method used to determine the cement tops, and provide gas analysis from all casing strings.

Reference: RBDMS KGR0828161632 on future correspondence.

Notify the Aztec OCD 24 hours before work is initiated.

If you have any questions, please call me at 505-334-6178, ext. 16.

Sincerely yours,

Kelly G. Roberts  
Deputy Oil and Gas Inspector  
District III - Aztec

CC: Well File
