13. Describe Proposed or Completed Operations

ConocoPhillips proposes to deepen this well. The current TD is 3497' and we would like to drill down to about 3587'. We do not anticipate any sustained gas flow from the PC, but we will use a mud logger to monitor the gas liberated drilling. This is located in the NE/4 of Section 13 of 29N, 6W. The additional footage will allow us to have a 90' sump below the coal for an improved operational configuration.

P.C. non-prod; Sump request granted 10/2/08 CEH

14. I hereby certify that the foregoing is true and correct.
