☐ Temporarily Abandon

☐ Water Disposal

☐ Water Shut-Off

☐ Well Integrity

☐ Other

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Due to an inaccurate pipe tally from rig personnel an excess of 126' was drilled past the original KOP of 2700' on the Carracas Unit #16. Energen Resources spotted a 500' cement plug from 1084' to 1584' MD, 205 sacks of class "G" at 16.5 ppg. This plug took longer to set up than expected and was still green during dressing. A second plug of 200 sacks of class "G" with 0.3% HALAD 322 was spotted to give a firm kick of point. This plug was successful and the well was kicked off as expected.
