13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

Previously we stated that the above well would be based on a fixed percent allocation. After further research of the well we have found that allocating on a subtraction method using the projected future decline for production in the Blanco Mesaverde as well as the Pictured Cliffs will more accurately represent production in each formation. The production from the Mesaverde and Pictured Cliffs shall serve as a base for production subtracted from the total production of the commingled well. The balance of the production will be attributed to the Otero Chacra. Attached is the future production decline for the Blanco Mesaverde & the Pictured Cliffs.
