13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In regards to a telephone conversation between Mr. Jim Lavato, BLM, and Larry Schlotterback, BP, on Thursday, February 19, 2009, BP respectfully requests permission to temporarily flare the above captioned well. The Storey B LS 1A was to be cleaned-out and the Mesa Verde formation opened. However, due to unexpected gas volume and the close proximity to highway 173, BP feels it would be safer to flare the trapped gas rather than vent. It is estimated that approximately 1-3 MMCF may be flared.

## Proposed flare schedule:

Thursday, Feb 19 - Begin flaring 4:30 PM through Friday, Feb 20 - End Flaring 6:00 PM

Sunday, Feb 22 - Begin flaring 4:30 PM through Monday
