Re: Notice that UIC Permit No Longer Effective  
Permit No.: 06SNMJ1P9071  
Well No.: Jicarilla 30-5  
Location: NE/4, Sec. 32, T 25N, R 4E  
Rio Arriba County, New Mexico

Dear Ms. Clugston:

The referenced permit, issued on June 29, 2001, is in effect until the well is plugged or the permit has been terminated. Your February 2, 2009, letter and a January 9, 2009, inspection indicate that the well has been plugged. Therefore, the permit for the well is no longer effective. Future use of this well for underground injection would require a new Underground Injection Control program permit.

Please inform Mr. Ronald Van Wyk within 15 days from the date of this letter at the letterhead address or by telephone at 214-665-6459 if you believe that the permit should remain in effect.

Sincerely yours,

Jerry Saunders  
Chief  
Water Resources Section
