13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Completion operations are scheduled to begin November 21, 2003 on the above well. The cavitation process is expected to take about 4 weeks, which would conclude approximately December 19th 2003. The production facilities have already been installed for this well so that minimal time and disturbance would be required to put the well on the production line.

Williams Exploration And Production respectfully request permission to continue the completion operations of this well past December 1 as required to properly place this well into production at its optimal rate.

14. I hereby certify that the foregoing is true and correct
