BOP Configuration

Change

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Due to problems with the planned BOP Key Energy was using, ConocoPhillips needs to change the BOP configuration initially submitted to the following:

1. Change in BOP to a double ram instead of an annular and single ram
2. To request an exception to Onshore Order #2 to
 - Allow us to test our BOP and 9-5/8" surface casing to 1000 psi in lieu of Onshore Order #2 requirements
 - Allow us to test our BOP and 7" casing (for the cavitation program) to 1800 psi in lieu of Onshore Order #2 requirements.

See attached BOP Schematics - one for drilling to intermediate casing point & setting 7" intermediate casing and the other for the cavitation program.
