Surface Commingle
Permit

13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

This sundry notice is filed pursuant to Amend Order R-10604. The current order allows for the surface commingling of 3 wells and stipulates yearly testing of each well to determine production allocation.

In January 2009 meters were added and therefore production from each of the 3 wells is metered individually prior to being commingled. BP America respectfully requests permission to add a 4th well - the Sammons GC F 1S (30-045-33104) to the surface commingle permit. (see attached schematic)

The production from each well (that needs a separator) is separated prior to the allocation meter. Production from each well will be metered prior to being commingled. The commingled production is then sent through compression prior to entering the sales meter. The difference between what is measured prior to commingling & what is sold through the sales meter is the fuel usage. This fuel usage is allocated back to each well based on the well production.

The working interest, royalty & overriding royalty interest owners in the subject wells is diverse therefore all were notified by copy of form C-103 certified return receipt on March 20, 2009. **Please see attached Schematic & Order R-10604**
