

## WELL CORRECTION

Upon receipt of Form 3160-5 for the Cowsaround 36 #13, Intent to Plug and Abandon, dated May 22, 2009, a review of the well and well file was performed. The following determinations were made:

1. API 30-045-28287 was listed for the well located 790' FSL, 790' FWL, Section 36, T26N, R12W, San Juan County, NM.
2. A second well, listed under API 30-045-22214, was found to have the same location.
3. The well was originally drilled by J.P. McHugh in 1976 under API No. 30-045-22214. It was subsequently plugged and abandoned May 25, 1979.
4. Edwards Energy filed to re-enter the well in 1990; however, it was designated as a "new drill" on the APD, and a new API ( 30-045-28287) was assigned to the well in error. Consequently, all subsequent drilling and completion operations were filed under API 30-045-28287 , as was the Intent to Plug and Abandon.
5. The original API, 30-045-22214, should be reflected for all records relating to this well.

On July 1, 2009, NMOCD records were updated with all information being reflected under API 30-045-22214. All production and disposition reported to 30-045-28287 will be moved to 30-045-22214. Additionally, API 30-045-28287 will be subsequently cancelled.
