If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In response to the BLM Letter/Notice of Non-Producing status of this well, dated June 23, 2009 (copy attached), Four Star Oil & Gas company respectfully submits this Sundry NOI to state that this well is currently, and has been, an active producer.

As a result of investigation and research into the reason for receipt of this letter, we have discovered internal reporting problems caused zero or no production to be recorded internally. This then caused erroneous reports to be filed to respective regulatory agencies. We have since filed correct positive production reports for the months of April and May, 2009 and are in process of back correcting production reports to the February, 2008 alleged "last produced" date referenced in the letter, showing this well as actively producing during this time.

Your consideration and approval of this NOI stating this well's status as an active producer will be greatly appreciated.
