In reponse to your Non-Producing Well letter dated September 02, 2009 (copy attached), Four Star Oil & Gas Company, respectfully requests for an extension of Shut-in status for this well until February 2, 2010.

We have recently attempted rigless work on this well testing tubing and pump activity, actually getting this well to pump, water only, for approximately two days and then quit. We currently have a procedure to pull tubing and downhole production equipment to repair or replace, and/or clean-out wellbore, as necessary, test and hopefully place this well back onto production. However, workover rig and scheduling constraints prevent us from moving onto this well to do this additional, necessary, work until mid to late December, 2009, at the earliest.

Your consideration and approval of this request to extend the Shut-in status until February 2, 2010 will be greatly appreciated and allow us the necessary time to conduct our planned work to return this well to producing status.
