NATURE OF RELEASE

Type of Release - Condensate	Volume of Release - 5 BBL	Volume Recovered - none
Source of Release: Tank overflow	Date and Hour of Occurrence	Date and Hour of Discovery 3/27/08 - 12:00 p.m.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? OCD - Brandon Powell via email BLM - Kevin Schneider via email	
By Whom? Kristina Kovach	Date and Hour - 4/4/08	RCVD APR 10 '08 OIL CONS. DIV.
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	DIST. 3

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* **A Western Refining driver discovered a condensate spill of approximately 5 BBL at the San Juan 28-7 #160E on the afternoon of 3/27/08 when he arrived to pull the oil tank. The spill resulted from a tank overflow. The kill switch on the tank was disabled, not enabling the well to shut down when the level in the tank got too high. The condensate continued to be dumped to the tank, and the fluids ran down the side of the tank onto the ground inside of the berm.**

Describe Area Affected and Cleanup Action Taken.* **All of the spilled fluids were contained within the berm, but none have been recovered. The affected area measures 20'x20'. The well was shut in. A crew steam cleaned the location and will excavate the affected soils. To prevent reoccurrence, the kill switch will be enabled.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
