If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* **Approximately 5 BBL of produced water was spilled as a result of a leak in the produced water pipeline. Upon discovery, all tie-in wells going to that pipeline were shut in. The spill traveled along the pipeline ROW in the vicinity of the SJ 32-7 #209A for approximately 300 ft. Approximately 1.5 BBL of the 5 BBL release of produced water reached a dry wash & traveled approximately 150 ft. Envirotech was mobilized to location for initial sampling & environmental spill clean up.**

Describe Area Affected and Cleanup Action Taken.\* **The analytical results of the initial samples collected by Envirotech in the flow path of the wash, indicated no environmental impact to the wash. All impacted soil along the pipeline ROW was recovered. Envirotech completed confirmation sampling and a final report will be submitted for final closure.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
