DIV. NATURE OF RELEASE DIST. 3 Type of Release - Condensate Volume of Release - 18 BBL Volume Recovered - none Source of Release: Condensate tank manway gasket leak Date and Hour of Occurrence Date and Hour of Discovery 4/2/07 4/2/07 - 11:00 a.m. Was Immediate Notice Given? If YES, To Whom? ☐ Yes ☐ No ☒ Not Required Brandon Powell - OCD - via email Mark Kelly - BLM - via email Date and Hour - 4/2/07 - 5:00 p.m. By Whom? Monica D. Johnson If YES, Volume Impacting the Watercourse. Was a Watercourse Reached? ☐ Yes ☒ No If a Watercourse was Impacted, Describe Fully.* Describe Cause of Problem and Remedial Action Taken.* Our MSO discovered a condensate spill of an estimated 18 BBL at the San Juan 29-6 Unit #32A on 4/2/07, due to a manway gasket leak on the condensate tank. The release estimate is based on monthly tank gauges. All fluids remained within the bermed area and affected an area 10' x 10', but no fluids were recoverable. The contents of the tank will be sold, the manway gasket repaired/replaced, and the stained soils will be remediated. Describe Area Affected and Cleanup Action Taken.* All fluids remained within the bermed area and affected an area 10' x 10', but no fluids were recoverable. The tank will be repaired and the impacted soils will be excavated and hauled to a commercial landfarm, with the excavated area being backfilled with clean fill dirt. Excavation will continue until it is determined that a five-point composite soil sample of the four sides and the bottom of the excavation has a TPH level of <5,000 ppm and a total BTEX level of <50 ppm, or to the maximum depth and horizontal extent practicable. (A field soil vapor headspace measurement of 100 ppm may be substituted for the BTEX analysis.) Final lab analysis results will be included in the final report following remediation activities. I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
