NATURE OF RELEASE

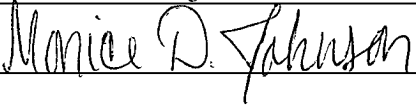

Type of Release – 2% KCl water	Volume of Release – 30 BBL	Volume Recovered – none
Source of Release: Frac hose leak between tanks and blender equipment	Date and Hour of Occurrence 11/19/07 – 11:20 a.m.	Date and Hour of Discovery 11/19/07 – 11:20 a.m.
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? OCD – Charlie Perrin via phone & Brandon Powell via voicemail & email	
By Whom? Monica D. Johnson	Date and Hour – 11/20/07 – 1:00 p.m.	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* **A spill of a maximum of 30 BBL 2% KCl water occurred at the San Juan 29-7 Unit #75E on the morning of 11/19/07 when during a frac, a suction hose on the frac tank suction manifold to the blender developed a leak. When the leak occurred, the frac job was shutdown immediately and the hose was replaced. The majority of fluids remained on location affecting an area approximately 20' x 60' x 6" deep in front of the frac tanks on the well pad. A small amount of fluids (<1 BBL) went off location behind the frac tanks, affecting an area approximately 15' x 3' x 6" deep. No spilled fluids were recovered.**

Describe Area Affected and Cleanup Action Taken.* **The majority of fluids remained on location affecting an area approximately 20' x 60' x 6" deep in front of the frac tanks on the well pad. A small amount of fluids (<1 BBL) went off location behind the frac tanks, affecting an area approximately 15' x 3' x 6" deep. All fluids soaked into the soil with none recoverable. The impacted soil will be allowed to dry and raked to promote rehabilitation, and will be evaluated for any further remediation (excavation) if needed.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
